

Next2.us SMS

Location based SMS social network

United States (English)

Kenya (English and Swahili)

SMS (simple message services) text messaging offers billions of customers an inexpensive way to communicate. Next2.us creates social networks around a place and topic using text messaging. With Next2.us SMS, you can set-up your account, set your location on a Google map and exchange messages with other Next2.us users based on location and topic. It's fast, easy-to-use; yet, powerful way to communicate.

Introduction

Do you want to find others near you that share your concerns or interests? Do you have a product or service that you think might be useful to your neighbors or community? Or maybe you just want to let your family and friends know where you are? Next2.us SMS lets you discover, connect and communicate with friends and neighbors by sending simple text messages.

Next2.us is easy-to-use, and works with with any mobile phone that can send and receive SMS text messages. If your phone can send and receive text messages you can join Next2.us geosocial network of users. To start just text message your country keyword followed by the reg command and the name and location you want to use to your country short code.

Next2.us is relevant. When you join Next2.us we set a radius "sharing" circle of ten (10) miles around your location. Next2.us only shares your text messages with others that are within your sharing circle and you are within their sharing circle. Want to change the size of your circle? Text "keyword srad" and a number from 1 to 3,000 (miles) to update the size of your sharing circle.

Next2.us is convenient. Messages sent to Next2.us are **automatically** exchanged between users based on location, sharing circle and keywords used in the text messages. When messages between users match all parties receive the matching message as a new text message on their mobile handset.

Next2.us is private and never reveals your mobile phone number. Send and receive text messages by using the Next2.us user name. You don't have to reveal your mobile phone number and you can stop and start the service at any time.

The Basics -- Next2.us SMS works in the continental United States and Kenya with inexpensive short code. Always start every text message with the country keyword. This lets our short code provider know that your text message is meant for us. Your mobile number can only be used with one Next2.us account at a time. To use a new name you need to first text unreg command to unsubscribe your mobile phone number before re-registering your mobile phone.

Account Settings -- To start your account text "reg" with the name and location you want to use. Next2.us will send back a text message and a password. (The name and password works at <http://m.next2.us> a web site with all Next2.us features via mobile browser) To change location text the "loc" command with a new location. Next2 will send back a text message confirming the address of the new location. When you set-up your account a service radius of ten (10) miles surrounds your location. To change your service radius text the "srad" command followed by a number from 1 to 3000 (miles). Next2.us will send back a text message with your new service radius. To stop receiving text messages text the "unreg" and we'll delete your account, stop sending you text messages and unregister your mobile phone number.

Next2.us country short codes, country keywords and SMS commands and explanation of how you can use Next2.us to send and exchange text messages with others near you are below.

Short code	Country and cost per message
95495	United States -- Text messages to 95495 in the USA. There is no per message cost but text rates may apply according to the text messaging plan of your mobile operator.
2225	Kenya – Text messages in Kenya to 2225. The cost is KSH 10 (to be KSH 5 after 2/2/11).

Text Keyword	Country
Next2	United States – All text messages sent to Next2.us in the United States start with the keyword Next2. This allows our SMS gateway provider to route your messages to the Next2.us service.
Kenya	Kenya – All text messages sent to Next2.us in Kenya must start with the country keyword Kenya. This allows our SMS gateway provider to route your messages to the Next2.us service.

SMS Command	To start, update and stop your account.
reg	Text “keyword reg name location” (Ex, Next2 reg Ben Bethesda MD). Reg means registration. Include the name and location you want to use for your account. You name works as a web page at http://m.next2.us/name
loc	Text “keyword loc street, city or state” (Ex, keyword loc 123 Main Street Leesburg VA or keyword loc Nairobi Kenya). Loc means location.
srad	Text “keyword srad # (Ex, Next2 srad 100 to increase your sharing circle to 100 miles/kilometers). Srad means service radius (sharing circle).
unreg	Text “keyword unreg” (To delete your account, stop all text messages and unregister your mobile phone.) Unreg means unregister.

Posting Messages -- There are two types of messages – public and private. Public messages match with public messages. Private messages match with private messages. Public messages are available at the Next2.us web site. Private message are not saved or displayed at the Next2.us web site. To post a public message text “keyword addp” followed by text of your message. To post a private message text “keyword addpp” followed by the text of your message.

Matching Messages using Keywords-- Next2.us uses a double keyword system to exchange messages. The first keyword is the *purpose keyword* and defines the reason for the post. Purpose keywords are “have” “want” or “discuss.” The second keyword is the *topic keyword* and defines the subject of your post. Topic keywords can be any single word or phrase. The double keyword system works with public and private messages.

SMS Command	To post and exchange public and private messages
addp	Text “keyword addp purpose topic + text” to post a public text message. (Ex, keyword addp have roadbike for sale Cannondale in good condition would like \$100 obo)
addpp	Text “keyword addpp purpose topic + text” to post a private text message. (Ex, keyword addpp discuss diabetes I am looking to connect to others that have type2 diabetes)
Purpose keyword	want or have or discuss (want matches have, have matches want, discuss matches discuss)
Topic keyword	Any single word or phrase (must be an exact match. For example “want roadbike + text” matches “have roadbike + text” The text that follows the purpose and topic keyword does not need to match.)

Direct Messaging -- Send a text message to any other Next2.us user by using the 4 number followed by the user's Next2.us user name.

SMS Command	To send a direct text message to another user.
4	Text "keyword 4 user_name + text" User_names are included when match messages are exchanged. To reply directly to a user text "keyword 4 (followed by space) user_name found in the match message with your message.

Extras – Share your location and public messages at your Next2.us homepage (http://m.Next2.us/user_name an example is <http://m.next2.us/brip>). If someone sends you a message from your Next2.us page it will be sent as a text message to your mobile phone. You can reply using text messaging or login to your Next2.us account using a mobile browser or a personal computer connected to the internet. Your public messages are shown at your Next2.us web pages. Your private text messages are NOT shown on your Next2.us web page. If you change your location or post a new messages they are immediately available at your Next2.us

Your Next2.us account name also works with mobile browsers and PCs connected to the internet at <http://m.next2.us>

Feature	Other Next2.us benefits include
Homepage	Share your location and public posts by sending people to your Next2 url at http://m.next2.us/user_name
Mobile	Your Next2.us user name and password work at http://m.next2.us mobile version.
Web 2 Text	Internet users can send you text messages from http://m.next2.us that will appear as new text messages on your mobile. You can reply and they receive reply on mobile or in Messages online.
Buzz	Chat with other users in real-time around location anywhere in world at http://m.next2.us
Topics	Browse public topic and text other users around a location in real-time at http://m.next2.us

Near-time message processing – Public and private messages are processed in "near" time. Near time is a point in time in the future when all messages posted to Next2.us are processed and exchanged as new text messages from Next2.us to subscribers. Processing messages in near-time allows us to send messages during off-peak hours reducing network congestion.

Please remember to start you text message with your country keyword followed by the Next2.us SMS command. You will receive a reply from Next2.us confirming that Next2.us has received your text message. Text messages sent directly to another user using the "4" command will not

If you have any questions please email help@hungrygarden.com or text message "4 brip" using Next2.us
